Final Business Insights Report

Dataset	Dataset.csv (Primeor Solutions)
Records	51,271 orders
Tools	Microsoft Excel · MySQL · Power BI
Prepared by	Pari Shree Gupta
Programme	Data Analytics Internship — Primeor Solutions
Date	June 2026

This report brings together findings from three stages of analysis. The dataset was first cleaned in Excel to remove duplicates, fix date formats, and handle missing values. SQL queries were then run to extract business metrics across products, customers, regions, and markets. Finally, a Power BI dashboard was built to visualise the results interactively.

The pages that follow summarise the most important findings — covering overall performance, market and regional revenue, product profitability, customer segments, and operational patterns.

Table Of Contents

1. Executive Summary — Key Performance Metrics

$12.64M	$1.47M	51,271	14.3%
Total Sales	Total Profit	Total Orders	Average Discount

Overview

The dataset covers four years of global e-commerce transactions (2011–2014) spanning 7 markets, 13 regions, and 3 product categories. Total revenue came in at $12.64 million with a net profit of $1.47 million — a margin of roughly 11.6%. With over 51,000 individual orders processed, the business is operating at significant scale. The average discount of 14.3% is worth watching; in some categories discounting is clearly eating into margins more than it should.

Top 5 Products by Sales

Product	Total Sales
Apple Smart Phone, Full Size	$86,936
Cisco Smart Phone, Full Size	$76,441
Motorola Smart Phone, Full Size	$73,159
Nokia Smart Phone, Full Size	$71,904
Canon imageCLASS 2200 Advanced Copier	$61,600

Key Insight — Smartphones take the top four spots by sales value, with Apple, Cisco, Motorola and Nokia together contributing over $308,000. This points to strong and consistent demand for technology hardware, particularly in the phones category.

2. Market and Regional Revenue Analysis

Revenue by Market

Market	Revenue	Share %	Rank
APAC	$3,581,785	28.4%	1st
EU	$2,937,166	23.2%	2nd
US	$2,297,022	18.2%	3rd
LATAM	$2,163,919	17.1%	4th
EMEA	$805,053	6.4%	5th
Africa	$783,345	6.2%	6th
Canada	$66,932	0.5%	7th

> **Key Insight** — APAC leads all markets at $3.58M (28.4% of total revenue), followed by EU at $2.94M. Together these two regions account for over half of all revenue. Canada, at just $66,932, contributes less than 1% — either a low-priority market or an untapped growth opportunity.

Top Regions by Sales

Region	Total Sales
Central	$2,821,740
South	$1,600,600
North	$1,248,121
Oceania	$1,098,253
Southeast Asia	$883,702
North Asia	$846,991
EMEA	$805,053

> **Key Insight** — Central is the top region at $2.82M — almost double South, the second-highest. Oceania and Southeast Asia both feature strongly, reflecting healthy APAC penetration below the headline market figure.

3. Category, Segment and Product Profitability

Profit by Category

Category	Total Profit	% of Total	Assessment
Technology	$663,343	45.2%	Strongest
Office Supplies	$518,373	35.3%	Moderate
Furniture	$286,182	19.5%	Weakest

Key Insight — Technology is by far the most profitable category despite having fewer orders than Office Supplies. Furniture lags significantly — likely due to high shipping costs and aggressive discounting — and deserves a pricing review.

Top 5 Loss-Making Products

Product	Net Loss
Cubify CubeX 3D Printer (Double Head)	-$8,880
Lexmark MX611dhe Monochrome Laser Printer	-$4,590
Motorola Smart Phone, Cordless	-$4,447
Cubify CubeX 3D Printer (Triple Head)	-$3,840
Bevis Round Table, Adjustable Height	-$3,650

Key Insight — 3D printers are the single biggest source of losses. Both Cubify models appear in the top five, suggesting that pricing, returns, or supplier cost structures need to be revisited. The cordless Motorola handset is an outlier worth investigating separately.

Customer Segment Performance

Segment	Total Sales	Revenue Share
Consumer	$6,503,476	51.5%
Corporate	$3,822,954	30.3%
Home Office	$2,308,792	18.3%

Key Insight — Consumer purchases drive the majority of revenue at 51.5%. Corporate and Home Office segments tend to place higher-value individual orders and are worth targeting with dedicated account management or loyalty programmes.

4. Operational Analysis

Shipping Mode Usage

Ship Mode	Orders	% of Total
Standard Class	30,764	60.0%
Second Class	10,304	20.1%
First Class	7,504	14.6%
Same Day	2,699	5.3%

> **Key Insight** — Standard Class accounts for 60% of all shipments. Same Day delivery is used in under 5.3% of orders. Offering faster delivery options more prominently — especially in APAC and the EU — could improve customer satisfaction and retention.

Monthly Sales Trend

Period	Sales	Observation
Jan – Feb	$1,217,303	Quietest period of the year
May – Jun	$2,173,812	Mid-year pickup begins
Aug – Sep	$2,725,939	Noticeable mid-year spike
Nov – Dec	$3,132,135	Peak — holiday and year-end demand

> **Key Insight —** Sales follow a clear seasonal curve. November and December together account for roughly $3.1M — the strongest two-month stretch by some distance. The January–February dip is predictable but pronounced.

Conclusion:

1. Double down on APAC and EU. These two markets generate over half of all revenue. Deepening product availability and investing in retention here will deliver the clearest returns.

2. Address loss-making products. Both Cubify 3D printer models and the Lexmark laser printer are generating significant losses. A cost audit covering supplier pricing, shipping, and return rates should be the first step.

3. Tighten discounting in Furniture. Furniture carries the highest average discount rate alongside the weakest profit margin. Reducing promotional depth in this category would directly improve the bottom line.

4. Plan around seasonal peaks. The November–December surge is consistent and substantial. Building inventory and marketing around this window — and running off-season promotions in Jan–Feb — would smooth annual revenue.

5. Explore Canada and EMEA. Canada contributes under 1% of revenue. Even modest growth there, combined with a push in EMEA (currently 6.4%), could meaningfully diversify the revenue base.
